

## Laird Connection Manager

On newer Trimble TSC3's and Spectra Precision Ranger 3's you may have noticed a new Icon in the connection menu, Laird Connection Manager. Data Collectors with this program seem to have issues connecting to WiFi using the standard procedure of connecting WiFi with Windows Mobile directly. Here is a guide showing how to use the Laird Connection Manager and it has seemed to have solved several WiFi issues.

**1. In Windows Mobile go to Settings**

**2. Go to Connections**

9. You will see the Profile as active in the Laird Connection Manager, Windows Mobile will show WiFi as On, but it is connected to WiFi. I would suggest trying to bring up [www.google.com](http://www.google.com) up on Internet Explorer as a test to verify the WiFi is working properly.
